

EOB Processing Made Easier

Have you wished for something that could expedite the processing of the thousands of pages of Explanation of Benefits (EOB) payment forms that hit your company each day - quickly, cost-effectively and most important, accurately?

AnyDoc Software has the solution you need to automate all your EOB processing — AnyDoc™EOB™. AnyDocEOB automatically processes your EOBs, capturing all the essential data, increasing speed and accuracy, eliminating manual data entry and saving your company money. There is even a wizard to walk you through easy step-by-step setup of your system for automation.

The proven powerful technology of AnyDocEOB includes a combination of AnyDoc Software's award-winning products designed specifically to handle the processing of EOBs. AnyDocEOB incorporates special features to handle these data-rich, small-type, and difficult-to-read forms.

Once your paper EOBs are scanned, the AnyDocEOB solution takes over. AnyDocEOB quickly searches through a complete EOB page in seconds, converting all the printed data into computer-readable data much faster and more accurate than possible with a human operator.

AnyDocEOB analyzes each scanned image, identifying key information such as patient header, subtotals and columnar line items and captures the data with up to 99.9% accuracy. Regardless of whether patient records are a single line item or span multiple pages, AnyDocEOB ensures patient records are kept together from capture to storage.

In addition, AnyDocEOB includes balancing features to identify, total, crosscheck and verify subtotals. Any lines that do not balance can be immediately flagged for an operator to quickly correct the error. The balancing feature allows you to insert and correct detail and subtotal lines before the final data is moved to your accounting system.

Plus with AnyDocEOB, every scanned EOB is retained as an electronic image allowing you to store records much more efficiently than in bulky filing cabinets. AnyDocEOB

includes special features to access patient information as both a full page scanned image and also by each individual patient record ensuring HIPAA-level patient protection.

Using the AnyDocEOB solution results in a rapid Return on Investment, most often realized in the very first year of production. AnyDocEOB allows you to quickly process all your paper EOBs, speed up receivables payment processing and take advantage of all your secondary billing opportunities.

- **Decrease Processing Time**
- **Minimize Manual Data Entry**
- **Free up Internal Resources**
- **Store EOB Pages Electronically**
- **Utilize Secondary Billing Opportunities**
- **Easy Setup for Each Insurance Carrier**
